HAMELIN BRANDS LIMITED

CORPORATE AND SOCIAL RESPONSIBILITY POLICY

Quality – Health & Safety – Environmental Policy

Hamelin Brands is a UK leader in supplying quality products for education, business and the graphic art world. We are part of the Hamelin Group that has a European focus, but our brands; Canson®, Oxford and Elba, are known and used throughout the world.

Our market and particularly the office supplies sector is changing very rapidly. Digital technology is impacting on consumer habits and the way in which companies are organised. The rise of Internet distribution will affect traditional methods of distribution via retail outlets. The digital revolution will also impact every level of our supply chain: global reduction in stock, shorter procurement times, increased demand for product availability, automated data exchange, etc.

In addition, increasing awareness of climate change and its dramatic consequences will gradually influence the need to protect natural resources and limit greenhouse gas emissions.

Therefore, the company must adapt to all these changes and anticipate the trends for the coming years by:

- Adopting a proactive outlook within our leading teams,
- Encouraging the commitment of our production facilities and support services,
- Ensuring that relations between companies run smoothly,
- Making our production facilities and the transactional process more productive,
- Winning the trust and recognition of our customers and stakeholders.

To succeed, and in the interest of all stakeholders, we are launching 5 major strategic initiatives to provide a framework for our objectives, priorities and responsibilities.

- LEAD: Providing concrete proof of the lasting benefits of our products and brands.
- JUMP: Improving our image as a reliable supplier by implementing the ISO standards.
- LEAN: Optimising our internal processes by making more widespread use of Lean Manufacturing techniques.
- FAIR: Becoming a recognised stationery expert by reinforcing our know-how
- SAVE: Reducing the impact of our activities on the environment.

The Managing Director and Managers are responsible for communicating and explaining the policy to their teams and providing all the human, technical and organisational means required to implementing it. The Sustainable Development Director is responsible for co-ordinating the actions required to implement it and for reporting on progress.

Philip Beer
